

M Ali

Software & Data Engineer

+44 7552 126113 | aliskepss@gmail.com | United Kingdom | github.com/skeptre | aliskeps.com

Education

Manchester Metropolitan University

BSc in Software Engineering

Manchester, United Kingdom

Sep 2023 – May 2026

Skills

Languages: Python, Java, JavaScript, SQL

Backend & APIs: FastAPI, REST APIs, JSON, API Integration, Authentication, SQLAlchemy

Frontend & E-commerce: Shopify, Liquid, HTML/CSS, JavaScript, Responsive Design, Storefront UX

Data Engineering: PostgreSQL, Pandas, Prefect, ELT Pipelines, Medallion Architecture

Testing & CI: pytest, GitHub Actions, Ruff

Tools: Git, GitHub, Docker, Docker Compose, Postman, pgAdmin

Projects

Retail & Operations Intelligence Platform | *Python, PostgreSQL, Prefect, FastAPI, Docker, pytest*

- Designed and built a production style ELT data platform using a medallion architecture (bronze/silver/gold), ingesting 50,000+ mock retail transactions through validated transformation layers into analytics-ready PostgreSQL tables
- Implemented idempotent SQL transformations with upsert patterns, a quarantine system for invalid records, and exponential backoff retry logic in the ingestion layer
- Orchestrated the pipeline with Prefect, exposed analytics through 6 FastAPI endpoints, and wrote 20 pytest tests covering transformations, validation rules, and API contracts
- Containerised the full stack with Docker Compose and configured GitHub Actions CI for automated linting and testing on every push

LLM Benchmarking Framework for Financial Sentiment Analysis | *Python, APIs, Data Analysis*

- Built an automated pipeline to benchmark large language models on financial sentiment classification tasks
- Designed data processing and inference workflows to standardise model outputs across multiple APIs
- Implemented evaluation metrics including accuracy, macro F1-score, and latency tracking, generating reports and visualisations for comparative analysis

Experience

Freelance Shopify Developer / Solo E-commerce Builder

Sep 2026 – Present

Small Business Clients

Remote

- Built and customised Shopify storefronts for small businesses, owning theme setup, product/catalogue structure, navigation, mobile UX, and launch readiness
- Worked directly with business owners to translate practical needs into store features, including collections, delivery information, product pages, and checkout-facing content
- Edited Shopify themes using Liquid, HTML/CSS, and JavaScript, and configured core store operations including products, menus, policies, delivery settings, and SEO metadata

Application Support Engineer

Apr 2025 – Sep 2025

Claris, Apple subsidiary

Remote

- Troubleshoot application workflows in FileMaker across scripts, layouts, data handling, and API-connected processes in cloud, server, and client environments
- Performed root-cause analysis on bugs involving business logic, data handling, and API integrations
- Debugged automation workflows using JSON and REST-based services, investigating system behaviour across distributed components
- Collaborated with engineering teams by providing detailed issue reports and reproduction steps
